

# Regional Cardiology Consultants

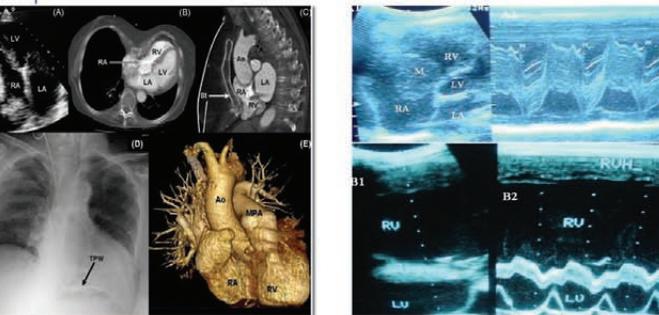

As more and more complex procedures are performed in the outpatient and inpatient setting, the risk of perioperative cardiac complication increases.

Our dedicated team specializes in providing the accurate and timely pre-op clearance required for your patients.

Our services include:

- Pre-op Consult by Board Certified Cardiologist
- EKG
- Phlebotomist for Pre-Op Blood Work
- Other diagnostic testing as needed to clear your patients.

***Better yet, all services can be performed in the convenience of your office.***

# Regional Cardiology Consultants

**Regional Cardiology Consultants** is dedicated to providing quality, comprehensive, state of the art, compassionate, cost-effective and timely medical services in the promotion of improved health for the greater patient community.

## Cardiac Clearance

*Comprehensive Pre-operative Clearance Services*

# CARDIAC CLEARANCE

provided by

*Regional Cardiology Consultants*

For the busy physician and surgeon, there are few things more inconvenient than having your patients arrive for their scheduled procedure only to discover that the EKG is missing or abnormal — or that the pre-op clearance cannot be found. Unfortunately, this happens much too often. With **Regional Cardiology Consultants' Cardiac Clearance**, your schedule will always proceed according to plan. Our team of specialists will clear your patients for surgery at any of our facilities, or at your office — a major convenience for your patients who otherwise would be visiting various destinations in preparation for their procedure.

*Patients requiring pre-operative Cardiac Clearance include, but are not limited to:*

- Patients with complex medical history
- Patients with co-morbidities including hypertension, obesity, diabetes, COPD, sleep apnea, dyslipidemia
- Patients with history of heart disease including CABG, coronary stents, peripheral vascular disease, stroke, previous MI
- Patients undergoing complex, high-risk surgical procedures
- Patients with any of the above undergoing eye surgery; orthopedic surgery; plastic surgery; or GI endoscopy with anesthesia.

# PREVENT ADDED STRESS AND ELIMINATE POTENTIAL DISASTER

Your patients are already stressed when facing their upcoming procedure. Navigating the necessary steps to obtain clearance can be complex and time consuming. Even worse, postponed procedures due to incomplete pre-op evaluations can put your patients' health at greater risk, while also losing revenue for your practice.

Regional Cardiology Consultants' **Cardiac Clearance** was developed to make the pre-op clearance process simple and efficient.

**Regional Cardiology Consultants** offers a full array of services customized to your patients' needs including:

- Pre-op consult by board-certified cardiologist
- Echocardiography with the newest equipment and registered sonographers
- Cardiac Stress Testing
- CT Angiography of the Coronary Arteries
- Outpatient Cardiac Telemetry for Arrhythmia detection
- Peripheral Vascular Studies
- Cardiac MR.

# STREAMLINED WITH SAME DAY SCHEDULING & RAPID REPORTING

You will receive a preliminary report the same day as our consult and **a folder containing everything you need to proceed with planned surgery** including the transcribed pre-op consult, EKG with interpretation, blood work and any other testing required to clear your patient.

**Regional Cardiology Consultants** streamlines the process for your patients — while providing added benefits for your practice.
